

Homework 5 - Write a technical report that should contain the following documents:

- a case study that reports the proposed project to the international/national reality
- technical details (architecture, technologies, marketing approaches) about existing solutions close to the one proposed by your team
- overview of technologies you wish to use and motivate your choices
- business canvas for the proposed solution
- architectural diagram for the proposed solution
- use-case diagrams for your project
- APIs (should be done in respect to the OpenApi specifications, using SwaggerHub) & functionality flows documentation
